JOURNEY TO SUCCESS
Stories!

A story of great determinination for doing something different from Giridih district in jharkhand.

— My short story

INTRODUCTION

I am Tuplal kumar verma from jharkhand, I have parents, grand father and one sister.

My school was done from a slum school where was student responsibility to clean classroom and outside ,once a week we used to paste a layer of cow dung to class room and corridor surface for maintain surface.

Roof of school was covered by sun dried clay tiles from which water drop was falling to class room and this part was quite fun moment for student .

I changed my school from class eight which is 4.5km from home and between them there was a river. Most of the villagers have the financial problem and so education environment was negligible there and so was mine . I inspired to read by our school head master speeches and lecture so started to study to score better marks and meanwhile worked as a shepherd for goat and cow in home as well as farming.

In monsoon season the river between home and school gets filled with water so for crossing the river we used to lift bicycle in shoulder . When water flow is so much that we were unable to cross than we used to travel from other path which is 12km .This was my fun and struggle moment in childhood.

Now my plus 2 intermediate school is 33km away from my home where I have gone some times by cycle due to not motorcycle in home and this thing motivated me to study more. I became district 3rd topper in class 12th and started to believe in myself .

COLLEGE

When I did not able to qualify JE advance I gets desparated and luckly I get mechanical department In BIT SINDRI .

I enjoyed whole first year due to ranging ,first time hostel life, five student in one room etc .I scored relatively less SGPA and started to read with determination from 2nd year and finally I able to make my position in top list .

Along with I started to study for GATE examination for 2019.

"My friends said

Whatever is occuring is for our good so just take daily action for improving ourself.

FACT

Financial facts about our situation and difficulties in buying a laptop.

Due to financial problem there are difficulties in paying large amount of fee ,so used to get lend from my relation .

Some financial facts in my family

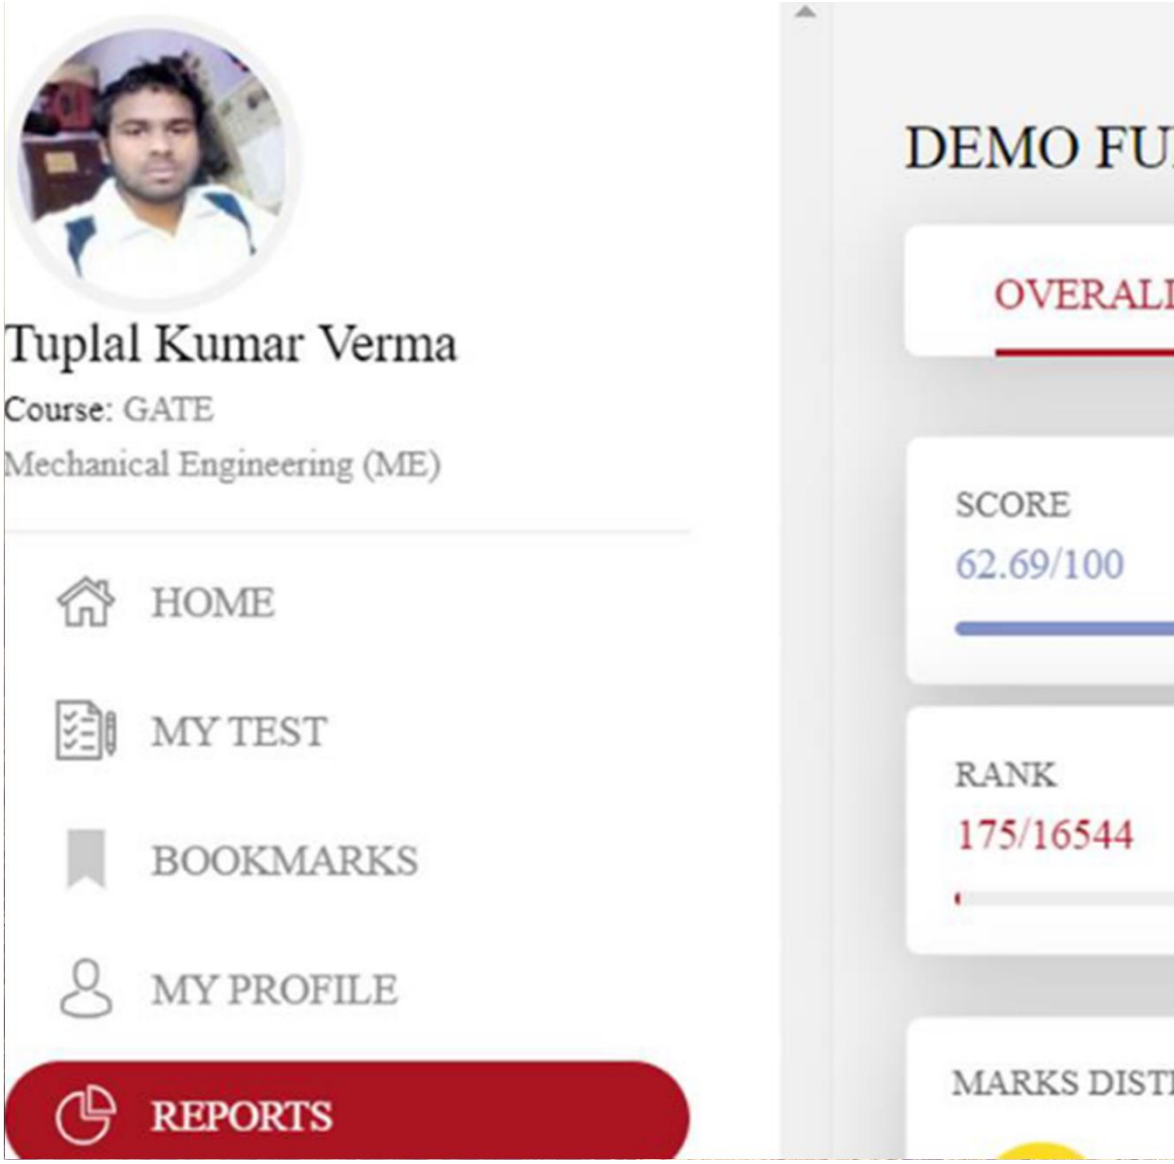
- * my family expanding only 600-1000 rupees a month.
  * Yet no two wheeler for travelling in my family is present.
  * my mother is also working to other farmer field for managing situation.

Buying a laptop required large amount of money and to collect this means creating lot problem to my parents to lend money by someone and pay slowly -slowly to them yet I have plan to buy second hand laptop for fulfill our need of laptop in study .

1

A screen shot of using laptop by giving GATE test shown

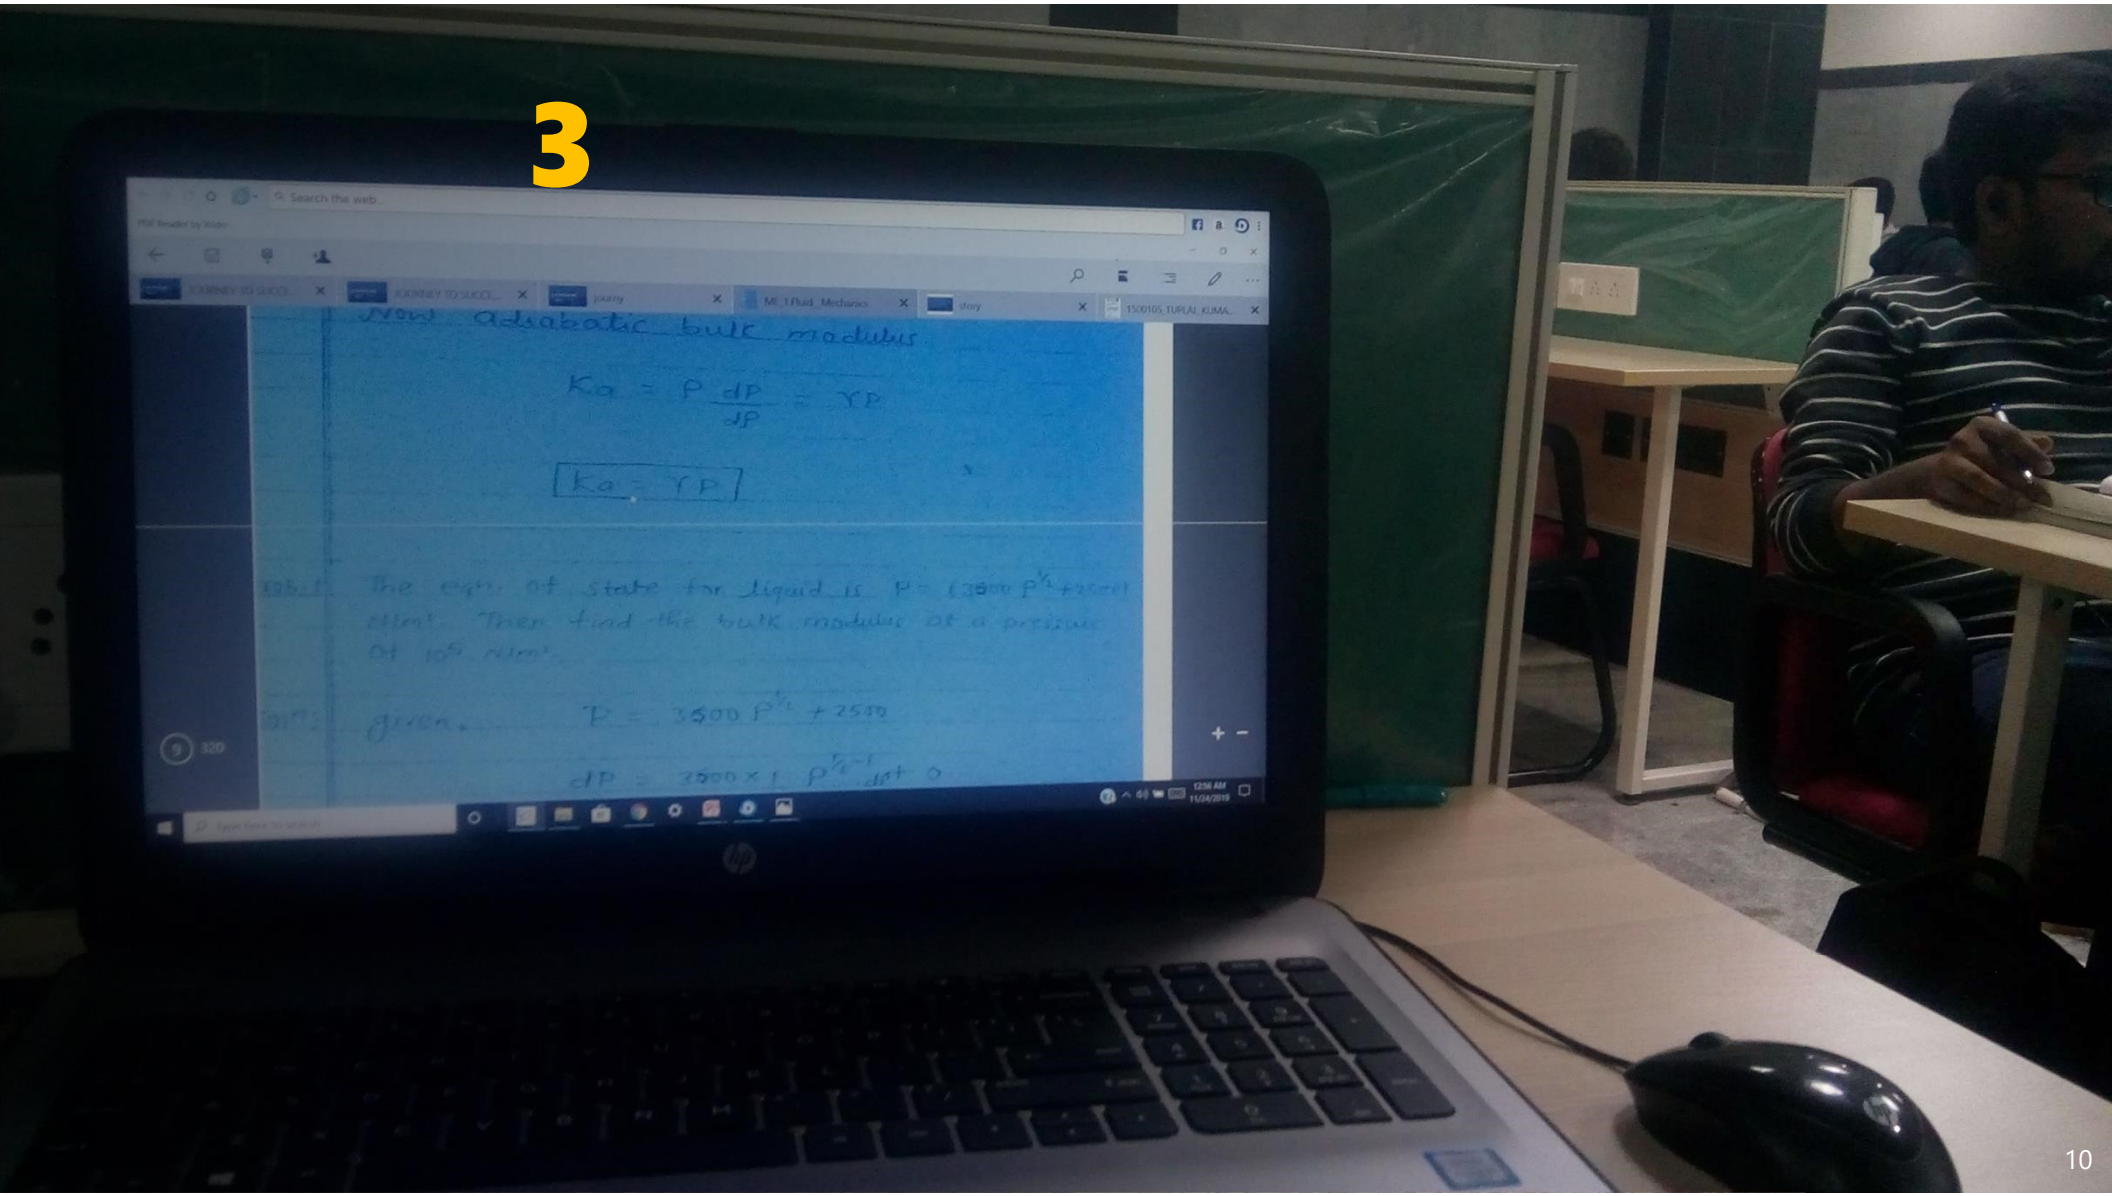
- * This laptop helped me to building self confidence to score a better rank in GATE examination.
- * I learned CATIA, CAD, C++,and now I am using MATLAB software in ISM Dhanbad for higher study in Machine design.



2

HOW I APPLIED

One my friend know all problem of mine and when he gets known about Anant Prayas which helping such type of student than he told me to apply .



3
Adiabatic bulk modulus
$K_a = P\frac{dP}{dP} = \gamma P$
$K_a = \gamma P$
$P = 3500\,P^{\frac{1}{5}} + 2500$
$dP = 3500 \times \frac{1}{5} P^{\frac{1}{5}-1} dP$

4

Now it becomes my duty that I will never leave Anant prayas ,whatever help can I do to this organization it will be my responsibility.

I would like to thanks to Alok sir and college alumni contributing laptop to the financial problem student by Anant prayas organization.

I am hoping that by reading my story you must will feel that your contribution is helping lot of student in developing their skill.

BECAUSE SOMEONE CARED
WE WIN EVERYDAY

THANK YOU
